

CLOUD SERVICE

# Desktop as a Service

DaaS is service to build virtual desktop infrastructure, allowing users to utilize the same desktop environment as the company from anywhere at any time remotely through network-connected devices such as tablets, smartphones, personal notebook or even smart TVs.

-  Any Where
-  Any Time
-  Any Devices

  
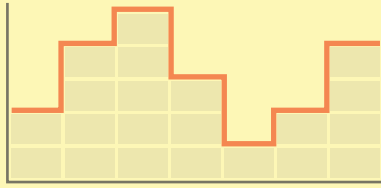

**Enhance IT Governance**

<b>Availability</b>	<p><b>Before</b></p> <p>Inaccessible to the corporate's system from home</p>	<p><b>After</b></p> <p>Be able to work at home as same as an enterprise environment</p>
<b>Security</b>	<p><b>Before</b></p> <p>Downloading illegal software or making a copy to USB flash drives</p>	<p><b>After</b></p> <p>For the security management of the users, IT administrators distribute only appropriate applications</p>
<b>Data Protection</b>	<p><b>Before</b></p> <p>Taking sensitive corporate data out of the office without permission</p>	<p><b>After</b></p> <p>Secure access to the company's data from anywhere</p>

# DaaS & VDI On-premise Type

## DaaS

### Low risk in investment

- No infrastructure investment upfront
- Enable predictable IT budgeting
- Pay per use

### Minimizing asset management with provided premium Infrastructure

- Reduce asset and inventory management efforts
- Reduce repair and replace expenditures for HW/SW

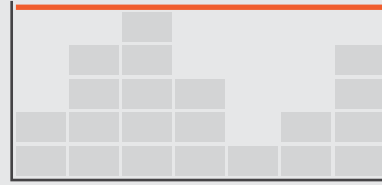

### Outsourcing operation and maintenance

- Provide professional support and operation by NTT Com Cloud specialist

### Reduction of lead time

- Simple deployment and management
- Expandable in a few days for additional resources

## VDI On-Premise

### Need for large investment

- Require upfront investment based on maximum capacity estimation

### Owning assets

- HW/SW CAPEX/OPEX required for servers etc
- Management of maintenance agreement for devices
- Risk of EOL handling

### Increasing of operations and skills

- Require VDI engineering skill
- Increase of operations for trouble handling

### Long lead time for implementation

- Long procurement lead time for device selection and terminal procurement

## DaaS Service Menu

Package	BASIC	SILVER	GOLD	PLATINUM
CPU	1 vCPU	2 vCPU	2 vCPU	2 vCPU
